

Shiba Inu Unchained

The Future of Digital Economy

Shiba Inu was on leash with a chain network of old layer one until...

SHIBA INU UNCHAINED - SHIBAU

Shiba Inu has its own chain, its own network. Shiba Inu was playing in a server room while on a leash attached to a chain network. While playing, he was struck by an electric shock, transforming into a Super Shiba Inu with super strength and super-intelligent mind power.

THE LEGEND - SHIBA INU UNCHAINED

Shiba Inu was playing in a server room while on a leash attached to a chain of Layer 1 blockchain. During play, he was struck by an electric shock that completely redefined him as a Super Shiba Inu, with the super strength to break old constraints and the super intelligence to create a new world of ultimate gains and profit. Shiba devised a plan to break free. Now it's time to take a leap with man's best friend your best friend—to shatter old constraints and leap towards a future filled with rewards, fun, laughter, and profits.

ABOUT US

STEP INTO THE SHIBA INU UNCHAINED'S UNIVERSE — WHERE LEGENDARY MEETS REVOLUTIONARY!

The iconic Shiba Inu is now supercharged with cutting-edge Layer 2 blockchain technology, and we're inviting you to be a part of this ground breaking journey.

Imagine diving into the ShibaU's universe, where you'll **unlock 2.5x** staking rewards and 200x the fun! It's time to unleash your loyal companion, ShibaU, from old constraints and leap into future brimming with incredible rewards and massive profits with endless laughter and unparalleled excitement.

SHIBA DEVISED A PLAN TO BREAK FREE AND CREATE HIS OWN UNIVERSE.

"The \$SHIBAU Coin and Presale is designed with the community at its heart, ensuring fair reward distribution while fueling the development of the expansive Shibau ecosystem and blockchain universe. With ambitious plans to introduce exchanges, DeFi platforms, and launchpads, the \$SHIBAU coin aims to become a cornerstone of the crypto market. Our mission is to make \$SHIBAU the most used and versatile coin, acting as a bridge and trading medium between major cryptocurrencies like BTC, ETH, and USDT, while simplifying transactions directly from bank accounts and cards. Say goodbye to hefty fees and slippage—\$SHIBAU delivers seamless, cost-effective crypto trading, maximizing value for its community and revolutionizing the way the world interacts with crypto. Together, let's shape the future of blockchain!"

“ THIS IS A WORLD BUILT BY SHIBA 🐕
LOVERS, FOR SHIBA LOVERS.
JOIN US AND BE PART OF
SOMETHING EXTRAORDINARY!

LAYER 2

UNLEASH THE POWER OF YOUR \$SHIBAU.

Layer 2 is a secondary framework or protocol developed on top of an existing Layer 1 blockchain (e.g., Ethereum). This layer enhances the speed, efficiency, and scalability of the Layer 1 blockchain, making it powerful enough to handle high-volume transactions with much lower fees.

WHY LAYER 2 ?

Layer 1

blockchains can experience congestion, leading to slower transactions and higher fees.

Layer 2

addresses this issue by handling transactions off-chain, resulting in less congestion with faster and cheaper transactions.

**SHIBA STARTS
BUILDING HIS
OWN
BLOCKCHAIN
UNIVERSE TO
MAXIMISE THE
PROFIT..**

BENEFITS

More Than Double Staking Rewards

A Network Developed by Shiba Lovers.

Faster Transaction Speed

Lowest Fees

Community Driven Profits.

OVERVIEW OF LAYER 2 SOLUTIONS

Layer 2 (L2) solutions are secondary frameworks or protocols built on top of an existing Layer 1 blockchain (e.g., Ethereum). These solutions aim to enhance scalability, reduce transaction costs, and improve throughput without compromising the decentralization and security of the base layer. Formula for Layer 2 Performance:

Layer 2 solutions leverage the following principles to improve performance:

- **Cost Efficiency:**

$$\text{Cost Per Transaction} = \frac{\text{Total Transaction Fee (L1)}}{\text{Number of Bundled Transactions (L2)}}$$

Layer 2 processes multiple transactions and submits a single batch to Layer 1, reducing per-transaction costs.

- **Throughput Improvement:**

$$\text{L2 Throughput} = \text{Base Throughput (L1)} \times \text{Scaling Factor}$$

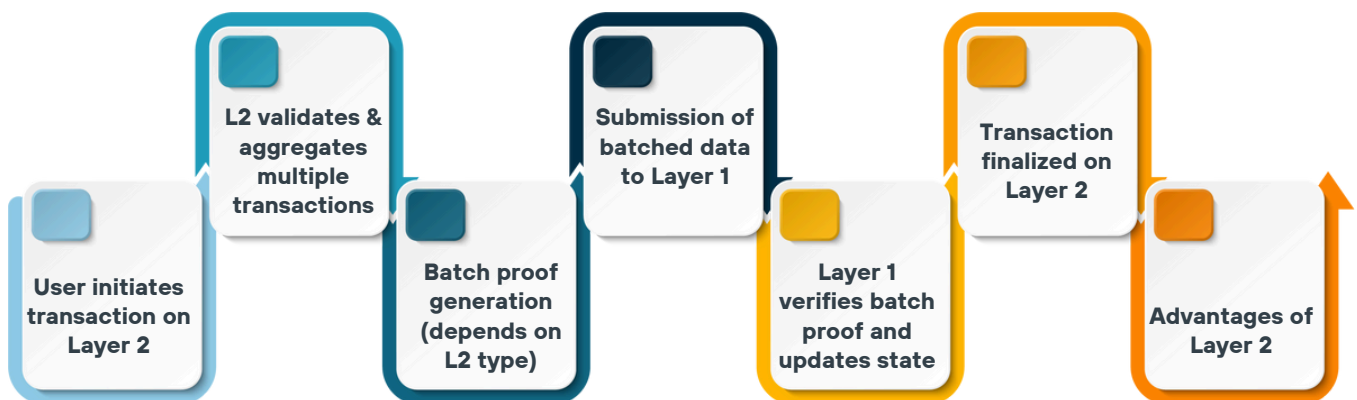

The scaling factor depends on the type of Layer 2 solution (e.g., rollups, sidechains).

- **Reduced Latency:**

$$\text{Latency (L2)} \approx \frac{\text{Processing Time (L2)}}{\text{Batch Submission to L1}}$$

- **Security Inheritance:**

Layer 2 inherits security from Layer 1 via cryptographic proofs, ensuring that L2 transactions are as secure as those on L1.

Advantages of Layer 2

Scalability: Processes thousands of transactions per second.

Cost Reduction: Low gas fees as batching spreads cost over many transactions.

Security: Retains Layer 1 security through cryptographic proofs.

Flexibility: Supports diverse applications like payments (e.g., Lightning Network) or smart contracts (e.g., zk-rollups).

\$SHIBAU UTILITIES AND APPLICATIONS

The \$SHIBAU coin is more than just a cryptocurrency; it is the backbone of the SHIBAU ecosystem & its expansive blockchain universe. It is designed to empower users and drive innovation, \$SHIBAU offers a wide range of utilities and applications that bring real-world value to its holders.

WHERE TO USE SHIBA U \$

1. Cross-Chain Bridge

\$SHIBAU acts as a bridge between major cryptocurrencies like Bitcoin (BTC), Ethereum (ETH), and Tether (USDT), enabling seamless interoperability. Users can exchange assets across chains without the need for multiple intermediaries or complex steps.

Key Benefit:

Lower Transaction Costs: Eliminate hefty fees and slippage.

Simplified Crypto Trading: Trade directly between major coins with ease.

2. Fiat-to-Crypto Gateway

\$SHIBAU integrates with banks and cards, allowing users to buy and trade crypto directly using fiat currencies. This feature removes barriers for new users and provides a user-friendly onboarding experience.

Key Benefit:

Instant Bank/Credit Card Purchases: No need for external exchanges.

No Hidden Fees: Avoid extra charges and slippage.

3. Reward Distribution and Staking

The \$SHIBAU token fuels a reward-rich staking mechanism, allowing holders to earn passive income while contributing to the ecosystem's growth.

Key Benefit:

Earn Dynamic APY Rewards: Higher rewards for early adopters and long-term stakers.

Community-Centric Rewards: Designed to give back to loyal holders.

4. Decentralized Finance (DeFi) Ecosystem

\$SHIBAU will power its own DeFi platforms, including decentralized exchanges (DEXs), liquidity pools, and lending protocols. Users can trade, earn, and borrow seamlessly within the Shibau ecosystem.

Key Benefit:

Efficient Trading: Zero slippage and low transaction fees.

Financial Inclusion: Access DeFi tools without barriers.

5. Shibau Launchpad for Projects

\$SHIBAU will serve as the native currency for the Shibau Launchpad, a platform for launching and funding innovative blockchain projects.

Key Benefit:

Support New Ideas: Back promising blockchain startups.

Exclusive Access: Early participation in token launches and NFTs

WHERE TO USE \$SHIBAU

6. Medium for Payments and E-Commerce

\$SHIBAU is designed to be a trusted payment solution for e-commerce, enabling fast and low-cost payments globally.

Key Benefit:

Global Payments: Make instant transactions anywhere in the world.

Low Fees: Eliminate costly payment processing fees.

7. NFT Marketplace Integration

\$SHIBAU will support the creation, trading, and purchasing of NFTs in its blockchain universe. This marketplace will cater to artists, collectors, and users looking to explore the growing NFT space.

Key Benefit:

Easy Access to NFTs: Mint, buy, and sell NFTs with \$SHIBAU.

Community-Driven Content: A marketplace tailored to the Shibau community.

8. Ecosystem Development and Governance

Holders of \$SHIBAU will have a direct say in the development of the ecosystem. From shaping DeFi protocols to deciding on new project launches, \$SHIBAU acts as the governance token for its blockchain universe.

Key Benefit:

Decentralized Decision-Making: Empower the community with voting rights.

Ecosystem Growth: Contributions directly impact the future of \$SHIBAU.

\$SHIBAU is set to revolutionize how people interact with crypto, bridging the gap between traditional finance and blockchain innovation.

- Cross-Chain Bridge
- Fiat-to-Crypto Gateway
- Staking and Rewards
- DeFi Ecosystem
- Launchpad
- Payment Solution
- NFT Marketplace
- Governance
- Liquidity Rewards
- Gaming & Metaverse

9. Liquidity Provider Rewards

\$SHIBAU incentivizes users to contribute to liquidity pools on its decentralized exchange. Liquidity providers (LPs) will earn rewards, further enhancing the ecosystem's functionality.

Key Benefit:

Extra Income for LPs: Earn rewards while ensuring smooth trading.

Boosted Liquidity: Support a vibrant & active trading environment.

10. Blockchain Gaming and Metaverse

\$SHIBAU will play a pivotal role in upcoming blockchain-based games and the Shibau metaverse. From in-game currency to owning digital assets, \$SHIBAU creates a seamless experience for gamers and virtual explorers.

Key Benefit:

Gaming Economy: Buy items, upgrades, and skins using \$SHIBAU.

Metaverse Integration: Explore and transact in the Shibau virtual universe.

BENEFITS OF SHIBA INU UNCHAINED

Shiba Inu Unchained (\$SHIBAU) offers higher staking rewards and lower fees via its efficient Layer 2 network, maximizing profits for the community.

More Than Double Staking Rewards

With reduced congestion by offloading transaction loads, resulting in operational cost-cutting and greatly increased efficiency, Shiba Inu Unchained (\$SHIBAU) can offer higher staking rewards. This means more profits for Shiba lovers by simply holding \$SHIBAU.

Network by Shiba Lovers

Designed to maximize profits for the Shiba Inu Unchained community, this network was built by Shiba lovers, for Shiba lovers.

Faster Transaction Speed

The transaction speed of Layer 2 is significantly faster than that of Layer 1. Experience the lightning speed of Shiba Inu Unchained when trading, staking, and interacting with \$SHIBAU.

Lowest Fees

With reduced load and congestion on the main blockchain, gas fees are significantly lower on the revolutionary Layer 2. This results in more profits on your investment, rather than high transaction costs. Shiba Inu shows love to its best friend community by maximizing rewards.

Community Driven Profits

Created by Shiba lovers, for the community, profits are driven back to the community. \$SHIBAU believes in giving back, showing its love through profits and rewards.

Less Slippage

With less congestion on the network, resulting in higher transaction handling rates in less time, slippage is reduced, maximizing your profits and gains.

15 IRRESISTIBLE REASONS TO JOIN US

Cross-Blockchain Bridge

Feature: Advanced cross-chain technology to connect Ethereum, Bitcoin, and other major blockchains.

Benefit: Enables users to trade assets directly without intermediaries, reducing transaction costs and increasing speed.

Revolutionary Aspect: The bridge leverages Shibau's unique protocols to eliminate compatibility barriers across chains.

P2P Marketplace Redefined

Feature: A fully decentralized P2P trading platform powered by smart contracts.

Benefit: Users can trade directly with each other without relying on centralized exchanges, ensuring privacy, security, and transparency.

Revolutionary Aspect: Shibau serves as the base currency for all transactions, taking full charge of transaction processing to eliminate frauds like chargeback scams.

Lowest Transaction Costs

Feature: Shibau leverages Layer-2 scaling solutions to minimize fees.

Benefit: Drastically lower transaction fees compared to existing platforms, making high-frequency and small-value trades viable.

Revolutionary Aspect: A fraction of the fees is redistributed back to the ecosystem, benefiting Shibau token holders.

Earn Interest by Holding Shibau

Feature: A staking mechanism allowing users to earn interest for holding Shibau tokens for a specific duration, akin to fixed deposits (FDs) or mutual funds.

Benefit: Provides a passive income stream, encouraging long-term investment in the ecosystem.

Revolutionary Aspect: Dynamic interest rates tied to platform growth, rewarding early adopters with higher returns.

Rewards-Driven Trading Ecosystem

Feature: Users earn rewards for every trade conducted on Shibau's platform or with Shibau tokens.

Benefit: Encourages higher trading volume and ecosystem loyalty while offering additional profit streams to users.

Revolutionary Aspect: A dynamic rewards system that scales based on trading activity and market conditions.

Transparent and Trustworthy

Feature: Blockchain-based escrow system to ensure secure P2P transactions.

Benefit: Eliminates the risk of fraud and disputes, enhancing trust in the platform.

Revolutionary Aspect: First-of-its-kind system integrated seamlessly into both the Shibau Exchange and P2P platforms.

Profit Sharing Through Tokenomics

Feature: Holders of Shibau tokens share in the profits generated by the platform.

Benefit: Passive income for users and a more engaging ecosystem.

Revolutionary Aspect: Dynamic profit distribution tied to trading volume and platform growth.

AI-Optimized Pricing

Feature: Real-time AI-driven algorithms optimize market spreads and liquidity.

Benefit: Customers enjoy the best possible rates for their trades.

Revolutionary Aspect: Proprietary AI models constantly refine pricing, reducing arbitrage inefficiencies.

Fully Tokenized Ecosystem

Feature: All services within the ecosystem are powered by the Shibau token.

Benefit: Single-token utility for staking, fee payment, rewards, and governance.

Revolutionary Aspect: Unified tokenomics align incentives across users, traders, and developers.

DAO-Governed Ecosystem

Feature: A decentralized autonomous organization (DAO) that lets token holders shape the platform's future.

Benefit: Transparent decision-making and community ownership of the platform.

Revolutionary Aspect: Unique voting mechanism prioritizing active traders and contributors.

Focus on Financial Inclusivity

Feature: Easy-to-use interface and support for fiat-crypto gateways.

Benefit: Onboarding underserved markets by simplifying access to crypto trading.

Revolutionary Aspect: Strategic partnerships to enable low-cost fiat on/off-ramps.

Focus on Financial Inclusivity

Feature: Easy-to-use interface and support for fiat-crypto gateways.

Benefit: Onboarding underserved markets by simplifying access to crypto trading.

Revolutionary Aspect: Strategic partnerships to enable low-cost fiat on/off-ramps.

Security with Shibau's Vault

Feature: Integrated wallet with multi-layer encryption and hardware wallet support.

Benefit: Users retain full control over their funds while benefiting from enterprise-grade security.

Revolutionary Aspect: Vault technology ensures funds remain safe, even in high-volume trading environments.

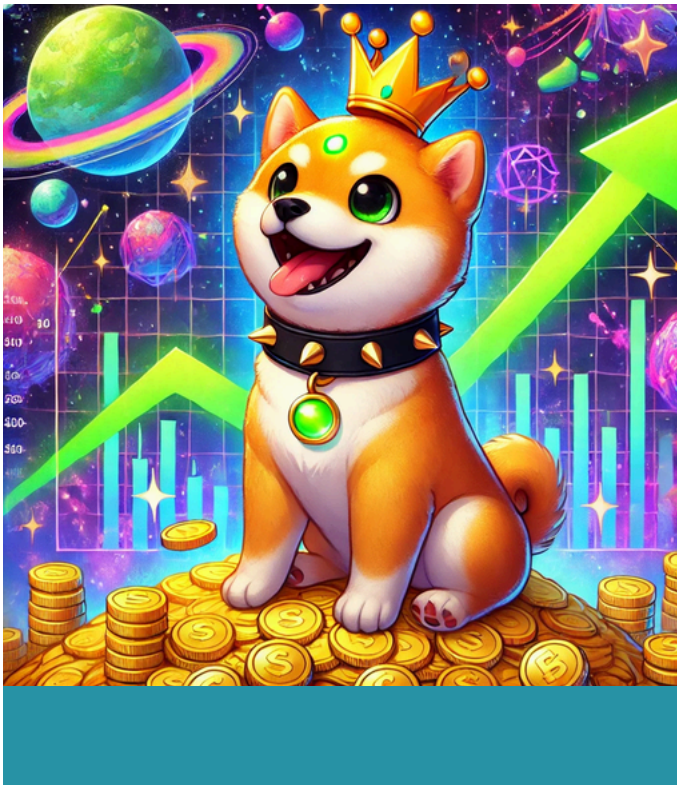

Community-Centric Growth Model

Feature: 50% of platform revenue is reinvested in ecosystem development, community incentives, and charitable initiatives.

Benefit: Ensures long-term growth and aligns with Shibau's mission to benefit customers.

Revolutionary Aspect: Unique reinvestment policy tied to both ecosystem health and user satisfaction.

HERE'S WHY WE STAND OUT

Team and seed coins lock

Team and seed funders coin will be locked for one year so that no insider can sell their coins and get a price drop resulting in loss of other investors.

LP BURN

All liquidity pool tokens will be burned so that the owner can do rug pull.

No minting

Owner/Team can't mint (generate) new coins any time and total supply will be fixed for lifetime. Resulting in undisturbed market supply and price.

Ownership Can't Renounced

Contract control will be at the owner's hand and he can't give authority and renounce contract owner controls to others.

Contract Not Upgradable

Contract code can't be upgraded or modified after being deployed. It gives full functional consistency but limited adaptability.

STAKING \$SHIBAU

OVERVIEW AND HOW IT WORKS

Staking is a process where users lock their \$SHIBAU tokens to support the network's operations, such as validating transactions or securing the blockchain. In return, they earn rewards, typically in the form of additional \$SHIBAU tokens or other benefits. Below is a detailed explanation of the staking mechanism for \$SHIBAU.

SHIBAU TOKEN INTRODUCES AN INNOVATIVE STAKING MECHANISM THAT REWARDS COMMUNITY LOYALTY AND DRIVES LONG-TERM GROWTH.

Why Stake \$SHIBAU?

Maximize Rewards Early: The earliest stakers earn the highest APY, making early adoption a key advantage.

Passive Income: Secure a steady flow of rewards while supporting the Shibau ecosystem.

Community Growth: By staking, you become a part of the movement that powers Shibau's mission to help and make humans happy.

Loyalty Bonuses: Long-term stakers benefit from increasing rewards and exclusive opportunities in future phases of the Shibau universe.

\$SHIBAU holders now have the exclusive opportunity to stake their tokens and unlock dynamic **Annual Percentage Yield (APY)** rewards. Early adopters who join the staking pool during its initial phase will earn the highest APYs, creating a strong incentive for early participation and long-term commitment to the Shibau ecosystem.

By staking your \$SHIBAU tokens, you don't just earn passive rewards—you secure your position as a pioneer in the **Shibau Blockchain Universe**, joining a vibrant and growing community of supporters. Staking rewards are designed to **prioritize early participants and reward long-term holding**, ensuring that dedicated holders gain the most value as Shibau's blockchain journey unfolds.

Benefits of \$SHIBAU Staking

Passive Income:

Users earn rewards for participating in the ecosystem.

Ecosystem Growth:

Locked tokens reduce circulating supply, potentially increasing token value.

Community Engagement:

Governance rights ensure that stakers have a voice in the project's future.

Security:

Staking incentivizes network security and stability.

HOW IT WORKS

STAKING

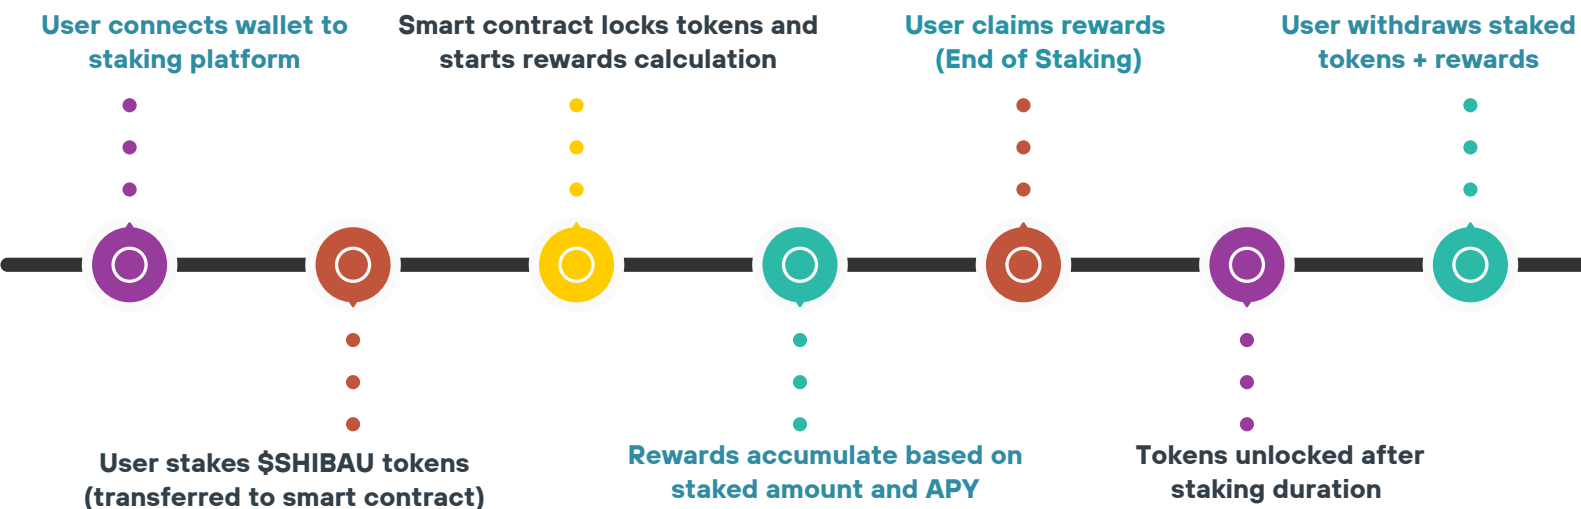

Join the Staking Pool: Stake your \$SHIBAU tokens during the early phase to unlock premium APYs.

Earn Dynamic APY Rewards: Rewards are calculated based on the staking amount and duration. Early adopters receive the most significant incentives.

$$\text{Rewards} = \text{Staked Amount} \times \text{APY Rate} \times \frac{\text{Staking Duration (Days)}}{365}$$

Support the Vision: Help secure the Shibau blockchain while earning exclusive perks as a loyal member of the community.

VISUAL REPRESENTATION OF SHIBA U STEPS

DON'T WAIT! SECURE YOUR PLACE IN THE SHIBAU UNIVERSE TODAY BY STAKING YOUR \$SHIBAU TOKENS. TOGETHER, WE'LL BUILD A HAPPIER BLOCKCHAIN FUTURE FOR EVERYONE.

LET'S GET STARTED

IN 3 SIMPLE STEPS

Step 1: Create a Wallet

If you already have a compatible wallet, head to Step 2. If not, we recommend MetaMask. It's available as a browser extension for PC and as an app for mobile. Simply visit the MetaMask download page to get started.

Step 2: Load Your Wallet

If you're paying by card, skip to Step 3. Otherwise, load your favourite cryptocurrency into your wallet. We accept ETH, USDT, and BNB.

Step 3: Buy & Stake \$SHIBAU

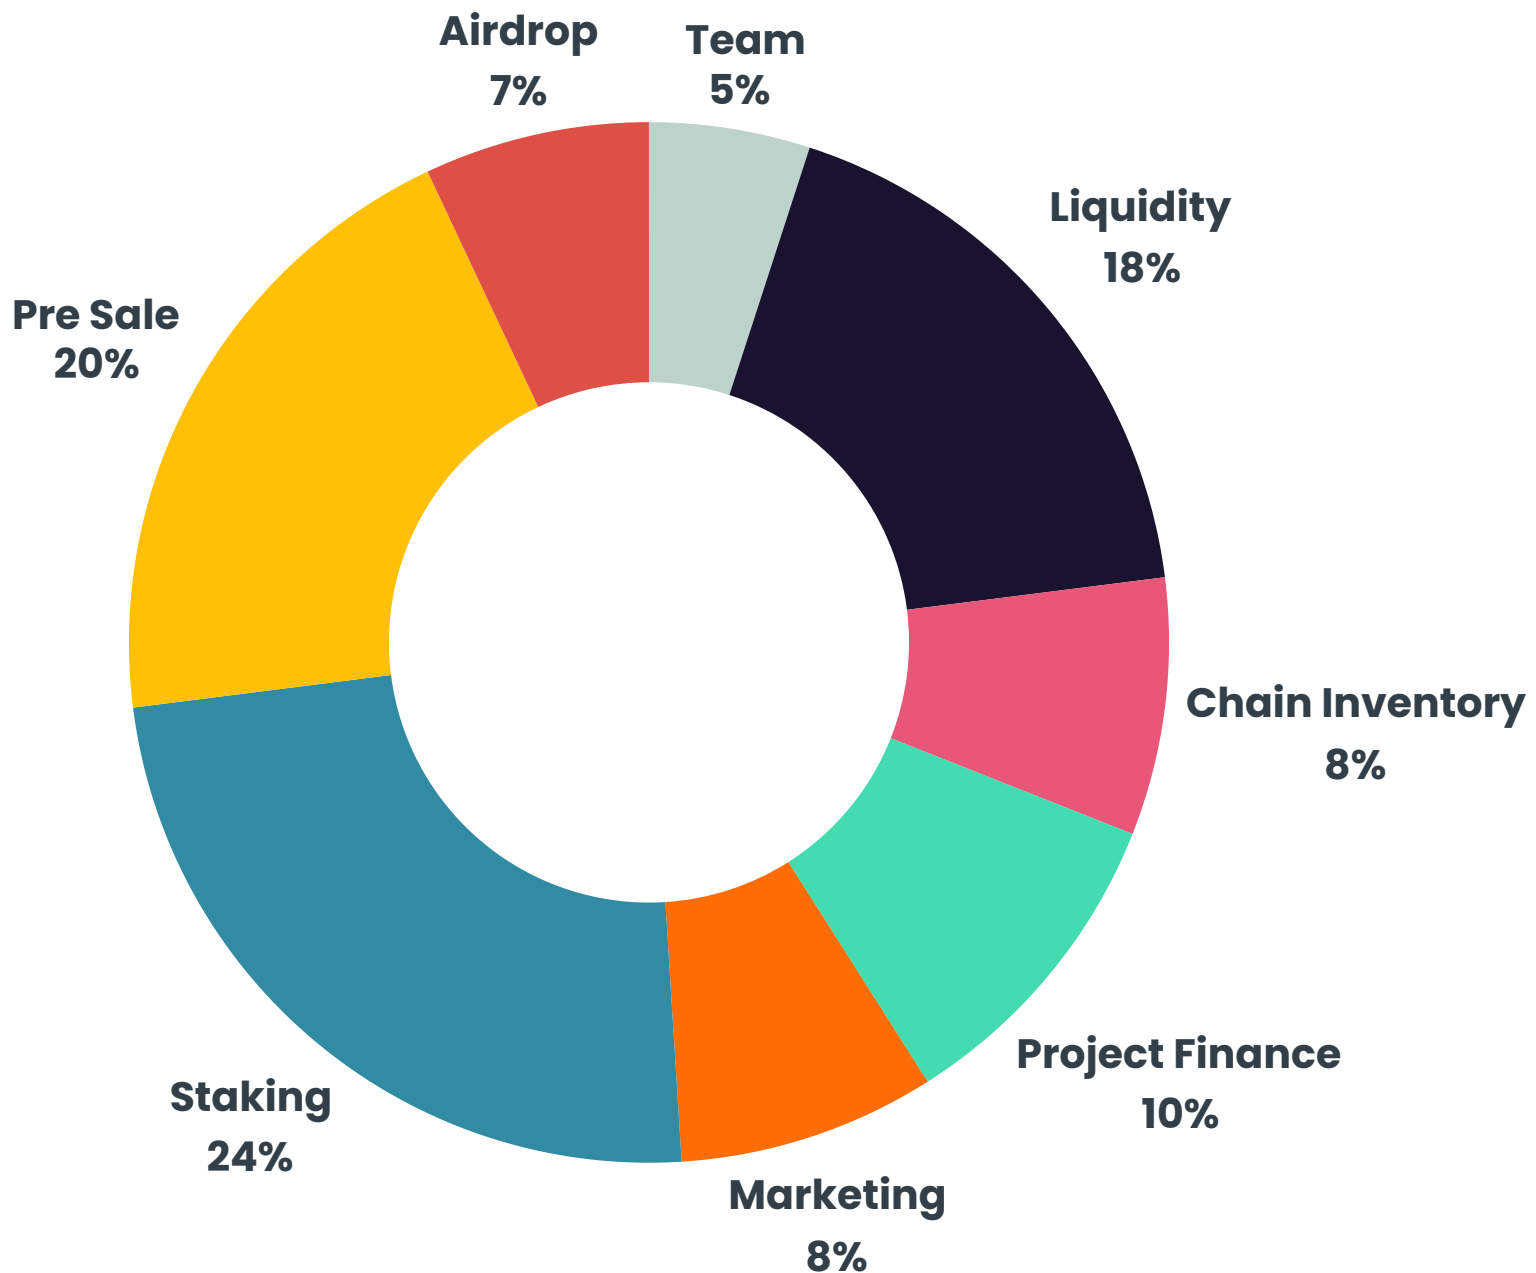

For maximum gains, connect your wallet to our website, choose a payment method, and decide how much \$SHIBAU you want to buy. Then, either buy or buy and stake for those MOAR GAINZZ.

FAQs

What is Shiba Inu Unchained?

Shiba Inu Unchained (\$SHIBAU) is an enhanced version of Original Shiba Inu, utilizing Layer 2 technology to double staking rewards for all stakers, especially benefiting presale buyers.

What is Layer 2?

Layer 2 is built on top of the Ethereum Network, allowing faster and cheaper transactions, making double staking rewards possible for Shiba Inu Unchained.

How Do I Buy Shiba Inu Unchained?

1. Create a Wallet: Use MetaMask if you don't already have a compatible wallet.
2. Load Wallet With Crypto: Use ETH, USDT, USDC or BNB.
3. Buy and Stake \$SHIBAU: Connect your wallet to our website, choose your payment method, and buy or buy and stake for max gains.

When Can I Claim My Tokens?

Tokens will be claimable after the presale ends and the token is launched. Reconnect the wallet you used to purchase and click claim.
